DWARF FRUIT TREES

PRICE LIST:

Small $\frac{3}{8}$ in. to $\frac{1}{2}$ in. trunk.....	\$2.00 each
Medium $\frac{1}{2}$ in. to $\frac{5}{8}$ in. trunk.....	3.00 each
Large $\frac{5}{8}$ in. to 1 in. trunk.....	4.00 each
Extra large 1 in. trunk and up.....	\$5.00 and up

DWARF AND ESPALIER TREES LISTING

Dwarf and Espalier trees bear the same fruit that is grown on the standard fruit trees you are accustomed to seeing. Most of these varieties are described in the standard tree list.

APPLES—Gravenstein; King David; Red Astrachan; Spitzenberg; Red Delicious; Golden Delicious; Yellow Transparent.

CHERRIES—Lambert; Bing; Royal Ann; Ostheimer Weichsel (Pie cherry).

PEARS—Bartlett; Flemish Beauty; Clapps Favorite; Williams Butter Pear.

PEACHES—Early Crawford; Elberta Improved; Improved Rochester; J. H. Hale; Rochester, Slappy (acidless); Strawberry (white flesh).

PLUMS—Beauty; Forest Rose; Monarch; Italian Prune.

APRICOTS—Perfection and Moorpark.

We have larger trees not listed.

ESPALIER FRUIT TREES

(Varieties same as above)

Please turn to inside of back cover for information you will want.

PRICE LIST:

One-Tier Spread, 6 to 8 feet—	
Height 2 to 3 feet.....	\$5.50
Two-Tier Spread, 6 to 9 feet—	
Height 3 to 4 feet.....	7.50
Three-Tier Spread, 6 to 10 feet—	
Height 4 to 5 feet.....	9.00
Four-Tier Spread, 7 to 10 feet—	
Height 5 to 6 feet.....	11.00

Older specimen trees in four, five and six-tier up to \$20.00. Four-tier trees and larger are too large to be shipped because they are too large to go through the door of the freight cars and trucks. Crating and shipping charges are extra.

STANDARD FRUIT TREES

PRICE LIST:

4 to 5 ft.	\$1.25
5 to 6 ft.	1.50
2 year Branched ...	2.00
2 year Selected	2.50

We have larger trees in some varieties priced up to \$5.00 each.

TO OUR CUSTOMERS

We have about two acres of trees, shrubs and plants of many varieties lined out in rows in nursery order. One acre is displayed at the sales yard at 64th and Barbur Boulevard, and one acre about one mile away. In addition we have growers who supply us so we can fill large orders. We invite you to visit our nursery and have your name put on the items you want. We will write your order with a 25 per cent down payment and hold the stock for 30 days, unless it is out of season for moving, such as large trees. In such cases we will hold until moving season. Our purpose is to keep the stock in the ground in good condition to avoid exposure. All stock in small sizes can be moved during the summer months and guaranteed for a small extra charge.

ORDERS

In mail orders we guarantee the plants and trees to arrive to the customer in a good growing condition. In any case the shipment is held up and is not in good condition, do not sign the express or freight bill.

REPLACEMENTS

This season we will replace stock that does not grow, to the extent of one-half its retail value, when the each price is paid, providing we are advised by June 15th and adequate proof is given. We cannot give replacements on trees and shrubs that leave the nursery balled in dirt.

ORDERING

Customers receiving their stock at the nursery can help considerably and can also avoid waiting by placing their orders a day or more before picking up. You may call in your orders up to 9:00 p.m. Phone CHerry 2928 or mail your orders in, advising us when you will pick them up.

TERMS

25% cash with order by mail, balance C.O.D. We pay shipping charges to the Rocky Mountains. Beyond please add 10%.

SUBSTITUTES

In filling small retail orders we will substitute when necessary unless advised not to by the customer.

RESPONSIBLE

In no case will the Villa Ridge Nursery be responsible for more than the original selling value of any stock sold.

CLOSED SUNDAYS

The nursery will be closed Sundays. In order to accommodate our customers we will be open late week days—until after dark during winter months and until dark while the days are long. Wednesday evening we will close at 6:00 p.m. We need your co-operation.

Planting Instructions:

Trees and shrubs should be planted so that the roots will grow into good top loam soil. Dig the hole large enough so the roots will not be crowded. Take clay and bottom soil out of the hole and replace with good soil. Care must be taken in using fertilizer, both commercial and green barnyard, as it will burn the roots if put in direct contact. Usually it is better to mix the fertilizer with the soil above the roots and allow the rain to wash it in, or wash it in with a hose. Many people try to be too good to their trees and kill them with fertilizer.
